January 2 2017

To all Members of PRWMA

We are very disappointed in what some people think can be recycled. We can only recycle clean cardboard, newspaper, flyers, office paper (shredded or not), milk jugs and milk cartons, most plastics'

We cannot recycle but do receive yard waste, bale wrap and twine, children`s toys or automotive parts, grain bags, building materials like 2X4s, pallets, gyprock, demolishin waste, furniture, cat litter, dog poop, clothing, and spoiled freezer food.

There is a difference between recycle bins and garbage bins and for the most part they are clearly marked but somehow some of the public cannot differentiate between them.

Can you please inform your populations of the difficulties they are causing and the extra costs involved with separating garbage from co-mingled recycle material.

Attached are some pictures of material we received mixed in the load Dec 21, 2016. As you can see these are not recyclable materials and waste time to remove and dispose of.

At the last board meeting it was decided there will only be public (including commercial and contractor) access to the landfill during open hours.

*Tuesdays and Thursdays from 2:00 PM to 5:00 PM
Saturdays from 9:00 AM to 3:00 PM*

*Thankyou
Grant See*
